HUCKTAINER® PANEL FASTENERS

HUCKTAINER® PANEL FASTENERS

- Designed to meet the requirements of the truck body and trailer industries, Hucktainers provide a high strength, vibration-resistant clamp.
- These fasteners will not crush or craze FRP (Fiberglass Reinforced Plywood) panels and are available with encapsulated heads for maximum corrosion resistance.
- PVC foam sealant under the head of the pin creates a weatherproof seal.
- Tamper proof uniform clamp.
- Pin-Lock is a nylon "star" that retains the pin in the hole prior to installation and are included on the Hucktainers with the "PL" suffix on the Huck reference number.
- Note: Only wide bearing pin (HLPE) and/or wide bearing sleeve (HLPS) should be used directly against FRP.
