

TUBING & TUBE FITTINGS

FLARED FITTINGS

STEEL SAE 37° FLARE FITTINGS

SAE 37° (JIC) STEEL FITTINGS

- Working pressure up to 10,000 psi, depending on tube and fitting size.
- Used with copper, brass, steel, aluminum and other tubing that can be flared.
- Applications include: medium and high pressure lines on heavy construction, agricultural and transportation equipment
- Meets or exceeds ASA, ASME, SAE and MS specifications.
- Good resistance to vibration. Use two or three-piece nut design where greater vibration resistance is required.
